

# Draw a Unicorn Step by Step

1. Start by drawing an oval. This will be the main part of the unicorn's face.

2. Next, draw a long, curved section on the lower end of the oval. This will be the unicorn's nose.

3. Next, draw the ears. Since the left ear is furthest away, draw the lines so they connect to the top of the head. Make the lines of the right ear a little lower.

4. Draw a long line from the top of the head for the top of the neck. Draw a shorter line from the chin for the lower part of the neck.

5. Erase the extra lines across the nose, on the neck, and on the right ear.

6. Draw the back of each ear with two short, diagonal lines.

7. Next, draw the unicorn's eye. As you fill it in, leave a small white dot as the catchlight. This is where light is reflecting off the eye. You can also add a couple of lines on the left side of the face to indicate the other eye.

8. Since the unicorn's face is turned, you only need to draw one nostril. Draw the nostril in the shape of a raindrop and color it in. Next, draw a line for the mouth.

9. Time to add the horn! Draw a long, thin angle with the two sides touching the unicorn's forehead. Do not worry about crossing over the lines for the left ear.

10. Erase the lines of the forehead and left ear that the horn crosses.

11. Add curved lines that go from one side to the other side of the horn. Make the lines larger as you go down the horn.

12. Add a mane by drawing short lines in the same direction the hair would go.

You drew a unicorn! You can also add a mark to the unicorn's forehead, such as a blaze or a star.
